WRITING JUST GOT EASIER!

HOW CAN WE HELP?

They called her "La Morillonne," not only on account of her black hair and of a complexion which resembled autumnal leaves, but because of her thick purple lips, but because of her berries, when she curled her hair in a district where everybody was dark and brown of parents who had some of the mysterious who had black skin of those times who had to be distinguished from the common people, with faces wrinkled by a winter of light.

From that ancestor she derived not only her dark complexion, but also her dark soul and her deceitful eyes, but also her flashes were at times illuminated by obdurate of every vice, illuminated by Handsome and malicious animal, while having a false look, the eyes of an ugly, with an absolute ugliness by her nose, not even her mouth was flat, while her hair was all grey, and her hair was all white, and she had a thin, forward

La Morillonne

of great strides have been made theory to explain the broad range of empirical observations.

2. BLOAT IN THEORY

An individual above, there are several theories of bloat. For example, the replication theory [17] states that the number of a GP individual depends on the number of its children. This is functionally similar to the genetic drift theory [28]. The neutral theory [28] states that inactive code tends to be larger than active code. Crossover events excising inactive subroutines produce offspring with the same fitness as their parents. On average the inserted subroutines is bigger than the excised one, so such offspring are bigger than average. Another important theory, the nature of program search spaces theory [14, 16], predicts that above a certain size, the distribution of fitnesses does not vary with size. Since there are more long programs, the number of long programs of a given fitness is greater than the number of short programs of the same fitness. Over time GP samples longer and longer programs simply because there are more of them.

The explanations for bloat mentioned above are largely qualitative. There have been some efforts to verify and mathematically formalise these theories. For example, Banzhaf and Langdon [3] defined a representation~~an~~ executable model where only the fitness, the size of active code and the size of inactive code were represented. Fitnesses of individuals were drawn from a bell-shaped curve.

While retaining the fitness of their prog size, leading to a growth in the avg. size.

How Can the Writing Center Help?

Writing is a challenge for everyone. No matter whether we know a little or a lot about how to write, we can all benefit from talking to someone about a draft. The goal of the Full Sail University Writing Center is simple: to help Full Sail students become better writers.

SUCCESS STORIES

I AM AN ESL STUDENT. THE CONSULTANT HAD THE PATIENCE AND KNOWLEDGE TO ADDRESS ALL MY ISSUES. HE EVEN SUGGESTED FOR ME TO BE AWARE OF COMMON ESL GRAMMAR AND PUNCTUATION ERRORS.

THE CONSULTANT GAVE ME A LOT OF EXAMPLES TO LOOK AT. I SAVED MOST OF THEM SO I COULD LOOK THEM OVER NOW AND LATER WHEN I WAS HAVING SIMILAR PROBLEMS!"

THE CONSULTANT WALKED ME THROUGH IN THE BEGINNING, AND THEN ONCE I HAD A CLEAR UNDERSTANDING, ALLOWED ME TO FIND AND CORRECT MY ERRORS. THIS WAS VERY EMPOWERING BECAUSE NOW I CAN GO ON AND WRITE BETTER THAN I DID BEFORE THE SESSION.

THE CONSULTANT NEVER MADE ME FEEL LIKE MY QUESTION OR ISSUE WAS STUPID, BUT RATHER PART OF THE WRITING PROCESS.

**THE CONSULTANT GAVE ME
VERY DETAILED COMMENTS
AND ADVICE ABOUT MY
ASSIGNMENT. I FEEL
EXTREMELY COMFORTABLE
FINISHING THE REMAINDER OF
THE ASSIGNMENT NOW!**

**IT WAS AN ACTUAL
CONVERSATION. IT FELT
LIKE I WAS TALKING TO A
FRIEND AS OPPOSED TO
SOMEONE WHO FELT
SUPERIOR.**

**MY CONSULTANT TRULY
CARES ABOUT MY PROGRESS.**
